

Portable Shoot Trailer with RETRIEV-ALL and HEPA Air Filtration System

CyberNational has specifically engineered a HEPA Air Filtration System along with a Containment Case for our Retrieval's that are installed in Shoot Trailers.

- Containment Case includes a clear polycarbonate front and side access door and a clear top to let light in.
- The Case has been test fired up to a 30-06 Springfield.
- The high capacity filter is designed to provide the highest level of filtration available for commercial and industrial applications.
- A sensitive, very accurate gauge that measures the actual filter obstruction, indicating when the HEPA filter requires changing.

- ✓ 7X14 TANDEM AXLE V-NOSE CARGO TRAILER
- ✓ RAMP DOOR, SIDE DOOR
- ✓ ACM paneled walls
- ✓ INDUSTRIAL RUBBER FLOORING
- ✓ 2 EACH – LED LIGHTING
- ✓ 1 EACH - BALLISTIC BLANKET – NIJ LEVEL IIIA

The Airflow is designed to pull discharge particulates away from the examiner, minimizing long-term exposure, through the filter and discharged to the outside of the trailer.
