

CyberNational, Inc.

RETRIEV-ALL

with HEPA AIR FILTRATION SYSTEM

CyberNational has a custom build Portable Retrieval-All with a HEPA Air Filtration System on wheels.

The Retrieval-All is principally designed as a **Brass and Shell Retrieval System** for any weapon ranging from pocket Derringer to 50 CAL. BMG.

**SAVE YOUR FIRING RANGE
USE THE RETRIEV-ALL.**

- ✓ Solid steel frame and tube.
- ✓ Inexpensive sand as the stop medium.
- ✓ Center pivot height adjustment.
- ✓ Vented / Extended shooting port.
- ✓ Can be used as a Clearing Device as well.

The Self-Contained HEPA Air Filtration System has an adjustable On / OFF switch. The Airflow is designed to pull discharge particulates away from the examiner, minimizing long-term exposure.

The filter housing is stainless steel, and constructed in a manner that prevents the bypassing of air-borne lead particles into the atmosphere. Filter elements will consist a laboratory-certified 99.97% HEPA filter.

The HEPA Air Filtration System is equipped with a sensitive, very accurate gauge that measures the actual filter obstruction, indicating when the filter requires changing. This allows the filter to remain in use and to not be replaced unnecessarily.
